

# Flexible.

## Avalara® Software Development Kit (SDK)

When your business needs sales tax automation, it's imperative to deliver the most accurate, complete service available: AvaTax.

The ease and convenience of using the AvaTax Software Development Kit (SDK) eliminates integration concerns. From multiple language compatibility to ease of integration with custom applications, the AvaTax SDK makes it a breeze to ensure you have integrated tax services that deliver unparalleled tax compliance capabilities.

### Integrate AvaTax with any accounting or e-commerce application—with AvaTax SDK.

Integrate fully compliant tax services into existing or developing applications. Build immediate installation and setup revenue and generate ongoing income via Avalara's SDK Development Partner program.

 **Convenience:** Code samples available for all supported languages and, more specifically, for vendor products such as ProStores, Magento and many more. We may already have the code for your solution readily available to copy and paste for plug-and-go convenience.

 **Access to Resources:** We don't leave you on your own. Our real-time support system is available to answer your questions or walk you through integration.

 **Ease:** The AvaTax SDK makes integration a snap, providing a simple, time-saving API for .net, Java or PHP, plus the availability of a powerful REST interface to our service that you can choose to use directly.

 **Fast & Reliable:** Once integrated, you take advantage of the high performance and reliability of our cloud-based services.

 **White Label Workflow:** Outshine your peers and make your customers' experience optimal through customizing and branding the console. Tailor customer reports and portal to give your customer the look and feel they want.

 **Ongoing Revenue:** Build ongoing income with Avalara's SDK Development Partner program.

### Getting Started

Avalara's AvaTax SDK provides development partners a simple and powerful way to utilize the Avalara web services Application Programming Interface (API) from their existing applications.

Our SDK contains a wealth of resources including code samples and documentation, providing a wide range of instructive and practical information.

# Forget About Sales Tax. Remember Avalara.

## Powerful Tool for Your Customers

Supercharge your application with the easy addition of full sales tax compliance and calculation with AvaTax. AvaTax SDK enables you to plug into a huge infrastructure of tax specialist expertise to deliver sales tax compliance with minimal effort.

## Improved Tax Compliance Capability

Your business will be secure that their tax calculations are accurate on each transaction. Through the AvaTax console, they have their sales tax information at their fingertips.

Add-ons such as AvaTax Certs and AvaTax Returns increase your revenue while delivering seamless, end-to-end sales and use tax compliance for your customers' businesses.

## Flexible, Low-Cost Software-as-a-Service (SaaS) Model

Using the SaaS model enables your customers to focus on their core business and more readily meet their fluctuating needs in this market. A flexible pricing model makes the AvaTax services scalable for any size business.

## Using the AvaTax Service API

The AvaTax Service utilizes the industry standard Simple Object Access Protocol (SOAP). All service calls are securely accessed via the SSL network protocol (<https://...>).

The AvaTax Service is made conveniently accessible via .net, Java or PHP via the AvaTax SDK. The AvaTax SDK allows developers to plug into our online service to empower their integrations to rapidly and correctly calculate sales tax for any address in North America.

The AvaTax service not only provides immediate and detailed tax calculation results, but also provides detailed reports for manual or automated filing and remittance of all collections.

### ⇒ Certify Your AvaTax Integration.

Certified for AvaTax is a solution certification achieved by Avalara partners whose AvaTax integrations have met Avalara's highest standard for partner developed solutions.

## Add-Ons.

End-to-end sales tax compliance at the click of a button.

### Certificate Management

Ensure valid customer exemption certificates are on hand immediately through electronic collection, storage and management. Certificates are immediately available to your accounting process making them accessible anywhere, anytime.

### Returns & Filing

File returns and remit payments on time using a single payment solution: AvaTax Returns. AvaTax Returns integrates seamlessly with AvaTax to handle all filing, reporting and payments for your business. Whether e-filing or hard-copy, AvaTax Returns performs the job.

## Getting started with AvaTax SDK is easy.

Take the next step toward delivering SaaS sales tax compliance.
